DETAILED ACTION

1. This Office Action is responsive to the communication filed on
2. Claims 1-, 5-14 are pending for examination. Claims 2-4, 15-26 are canceled.
3. The text of those sections of Title 35, U.S. code not included in this action can be found in a prior Office action.

Continued Examination Under 37 CFR 1.114

4. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/14/06 has been entered.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant amended claim 1 to move the step “setting a multi-partition boot selection flag” to the position immediately after the step “turning on a power of a computer.” The specification recites “...when the power is turned on, a multi-partition boot selection flag is setup and thus serves to select the operating system stored in different partition of the disk...” in paragraph [0016] and [0024]. This means the step “setting a multi-partition boot selection flag” can be executed at substantially the same time as that of the step “turning on a power of a computer.” Therefore this amendment is already disclosed in the specification and does not introduce new matter.

Examiner disagrees with the above assertion. Examiner fails to see how/where or any suggestion from the application’s specification, specifically, paragraph 0016, 0024 to support the above argument.

As discloses by applicant:

[0016] In one embodiment of the present invention, provided one of the partitions is not a bootable partition, a boot fail is indicated.

[0024] **Referring to FIG. 2, it is a schematic flow chart illustrating a selectable booting operation method by the BIOS with the multi-partition in the disk, wherein the disk comprises a plurality of partitions. In the operation method, at first, [step 1] the power of the computer is turned on (step S202), and [step 2] a plurality of hardware components in the computer is initialized (step S204). Then, [step 3] an interrupt service program (e.g. INT 19H interrupt service program) is executed, and [step 4] the MBR in the disk is read out (step S208). Meanwhile, the system control right is transferred from the BIOS to the MBR code inside the MBR. Then, [step 5] a multi-partition boot selection flag is set (step S210), which is then used to select one of the partitions (step S212).**

7. Claims 5-14 are rejected to as being dependent upon a rejected base claim.
